DESCRIPTION

KEYWORDS

A method for voting, including registering, voting, and auditing submitted votes. The method uses blinded vote certificates to maintain the autonomy of the voter and to validate that the vote is authentic. The vote certificate is blinded by hashing the unblinded certificate with a nonce (one-time-use random number). Acknowledgment messages are exchanged to verify receipt of the vote certificate, both unblinded and blinded. When auditing the vote, the certificate, nonce, and key is compared to the same items in the original request for registration to validate the identity of the voter.
